MinYen - The Advantages of 60083 Fire Retardant Master Batch

名言60083防火母粒優點

Excellent Fire-Retardant MB. Made form mineral . Economical and useful.

60083防火母粒，是針對PE、PP的防火要求，所開發之低鹵素，高效母粒。經濟實惠，阻燃效果強。

High concentration fire retardant powder, up to UL94V0 effect

高濃度防火粉，可達UL94V0效果

Made in master batch, easy to use. It can lower friction on film surface.

製成母粒狀，易於計量控制，方便進料。

Manufacture process and material can pass ROHS.

60083生產所需之原料、屬於低鹵素材質，可以通過ROHS檢驗

MinYen-Fire Retardant Master Batch Information

名言60083防火母粒特點

1. Effectively delays the burning rate of the product, and can control the combustion range within a certain area.

有效延緩產品燃燒速度，可將燃燒範圍控制在一定的面積內

2. It makes products foggy. If used in color products, it changes product color a little bit. Users should add more color masterbatches.

會使產品變霧，若用於有色產品則會讓產品顏色變褪，宜加重色母用量
